HUMMEL AG

We are based in Waldkirch and Denzlingen - that's to the north of Freiburg, right in the triangle where the German, French and Swiss borders meet. 2008 marks our company's 60th anniversary.

In 1948

the metalworking factory Anton Hummel Metallwarenfabrik was set up. It manufactured form-turned pieces and other parts for electrical, heating and sanitary installations.

In 1970

HUMMEL branched out into plastics technology.

In 1987

a fully automatic electroplating line was installed.

In 1995

HUMMEL was split into various divisions.

1994 to 2005

saw subsidiaries and branches being set up in Hungary, China, Italy, Brazil, Russia and the UK.

In 2008

the skills provided by the enterprise as a whole are being strategically reorganized - to create HUMMEL AG.

What's the best possible way of combining know-how? By doing development, design, tool manufacture, production, electroplating and assembly all under the same roof. HUMMEL operates and sets standards in the following product areas:

- Cable glands, cable protecting systems, connectors, housings
• Temperature controllers, operating-panels, industrial loading technology, sensor technology, controls
• System solutions, front panels, customized housings, cable assembly
• Customized metal and plastic parts
• Radiator Valves and Fittings, design technology

HUMMEL is a family-owned German business, and proud of it. It is independent, it is not tied up in a group, and it operates worldwide. What has made HUMMEL branch market leader? Its numerous patents and innovations, its constant technological developments, its wide vertical integration, its flexibility when it comes to special applications, and its clear strategy targeting success.

What has given HUMMEL its distinguished reputation? Its all-round system solutions and its wide range of top quality products. True to the motto, "We set standards". No matter how specific or varied they are: HUMMEL's extensive program enables it to respond quickly and flexibly to any customer requirements.

HUMMEL supplies quality certified in accordance with ISO 9001:2000, and in manufacture it takes a strictly ecological approach.
