

**RAMPA Cross Dowels type 2Q**  
can be employed in the same way as RAMPA Cross Dowels type Q (p. 20). They have one slot and two threads across the dowel.

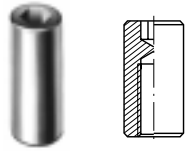

**RAMPA Dowel Nuts type RSK** with hexagonal socket are used in the assembly of tubular steel furniture, which can be disassembled. The nut lies crosswise in the tube and the internal thread tightens a through-bolt.

**RAMPA Knurled Nuts type RM** used as plugs, are knocked and glued into pre-drilled holes.
